

Appl. No. 10,627,345
Amdt. dated December 28, 2004
Reply to Office action of July 28, 2004

Amendments to the Specification:

At page 12 of the specification, please replace the Abstract of the Invention with the following:

An aural user interface for navigating a hierarchical structure of data and/or a plurality of levels of such structures. In one embodiment, an aural signal is provided indicating navigation through a hierarchical structure. In another embodiment, an aural signal is provided indicating navigation between levels of such hierarchical structures.
